Projects

CAS - 3D Equation visualizer

C-SHARP, ASP.NET, JAVASCRIPT

- This project wants to create software that can visualize a 3D of all the possible specified ranges of x and y in the equation directly in the browser. It was my middle school thesis.

Web Application - Order management

DJANGO, POSTGRESSQL, REST API

- This application wants to provide a web interface for a gesture of the order by three users: the client, the agent, and the manager. The client can view his order, the agent can view his order with her/his respective client, and the manager can see all the orders.
